* Joinpoint analysis of trends allowed for up to three joinpoints based on rates per 100,000 that were age-adjusted to the 2000 U.S. standard population.

† SEER (Surveillance, Epidemiology, and End Results) registries covering 10% of the U.S. population: metropolitan areas of San Francisco, Detroit, Atlanta, and Seattle-Puget Sound; and States of Connecticut, Hawaii, Iowa, Utah, and New Mexico.

‡ APC is the Annual Percent Change based on rates age-adjusted to the 2000 U.S. standard population using the joinpoint regression program.

§ APC is statistically significantly different from zero (two-sided p<.05).

‡ Joinpoint results are not shown if less than 10 cases in any year.
