Black	Female	1975-1991	1.3 <sup>c</sup>	1991-2000	-0.4				

The APC is the Annual Percent Change based on rates age-adjusted to the 2000 U.S. standard population by 5-year age groups using the Joinpoint Regression Program.

<sup>a</sup> Trends are from the SEER 9 areas.

<sup>b</sup> Trends are from the NCHS public use data file.

<sup>c</sup> The APC is significantly different from zero ( $p < .05$ ).

<sup>a</sup> Rates are based on End Results data from a series of hospital registries and one population-based registry.

<sup>b</sup> Rates are from the SEER 9 areas. They are based on data from population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound and San Francisco-Oakland. Rates are based on follow-up of patients into 2000.

<sup>c</sup> The difference in rates between 1974-1976 and 1992-1999 is statistically significant ( $p < .05$ ).

<sup>d</sup> The standard error of the survival rate is between 5 and 10 percentage points.

<sup>e</sup> The standard error of the survival rate is greater than 10 percentage points.

<sup>-</sup> Statistic could not be calculated.

Hispanic <sup>b</sup>	3.0	3.5	2.5	0.9	0.8	1.1

The APC is the Annual Percent Change over the time interval.

- Statistic not shown. Rate based on less than 25 cases for the time interval. Trend based on less than 10 cases for at least one year within the time interval.

<sup>a</sup> Incidence data are from the 12 SEER areas (San Francisco, Connecticut, Detroit, Hawaii, Iowa, New Mexico, Seattle, Utah, Atlanta, San Jose-Monterey, Los Angeles, and Alaska Native Registry).

<sup>b</sup> Hispanic and Non-Hispanic are not mutually exclusive from whites, blacks, Asian Pacific Islanders, and American Indians/Alaska Natives. Incidence data for Hispanics and Non-Hispanics do not include cases from Detroit, Hawaii and Alaska Native Registry. For mortality, information is included for all states except Connecticut, Oklahoma, New York, and New Hampshire.

<sup>c</sup> Mortality data are analyzed from a public use file provided by the National Center for Health Statistics (NCHS).

<sup>d</sup> The APC is significantly different from zero ( $p < .05$ ).

<sup>a</sup> US 2000 cancer prevalence counts are based on 2000 cancer prevalence proportions from the SEER registries and 1/1/2000 US population estimates based on the average of 1999 and 2000 population estimates from the US Bureau of the Census. Prevalence was calculated using the First Malignant Primary Only for a person.

<sup>b c d</sup> Statistics based on SEER 9 Areas    <sup>c</sup> SEER 11 Areas    <sup>d</sup> SEER 11 Areas excluding Hawaii and Detroit.

<sup>e f g h</sup> Percentages are age-adjusted to the 2000 US standard population by 5-year age groups.

<sup>f</sup> Cases diagnosed 25 years or more ago were estimated using the completeness index method (Capocaccia et. al. 1997, Merrill et. al. 2000). <sup>(g)</sup>Complete prevalence is obtained by summing 0 to <25 with >=25. <sup>(h)</sup>Age-specific completeness index was approximated using empirical data from historical Connecticut tumor registry.

- Statistics not shown. Rate based on less than 25 cases estimated alive for the time interval.

+ Not available.

# SEER Incidence, Delay Adjusted Incidence and US Death Rates+ Brain and Other Nervous System Cancer, by Race and Sex

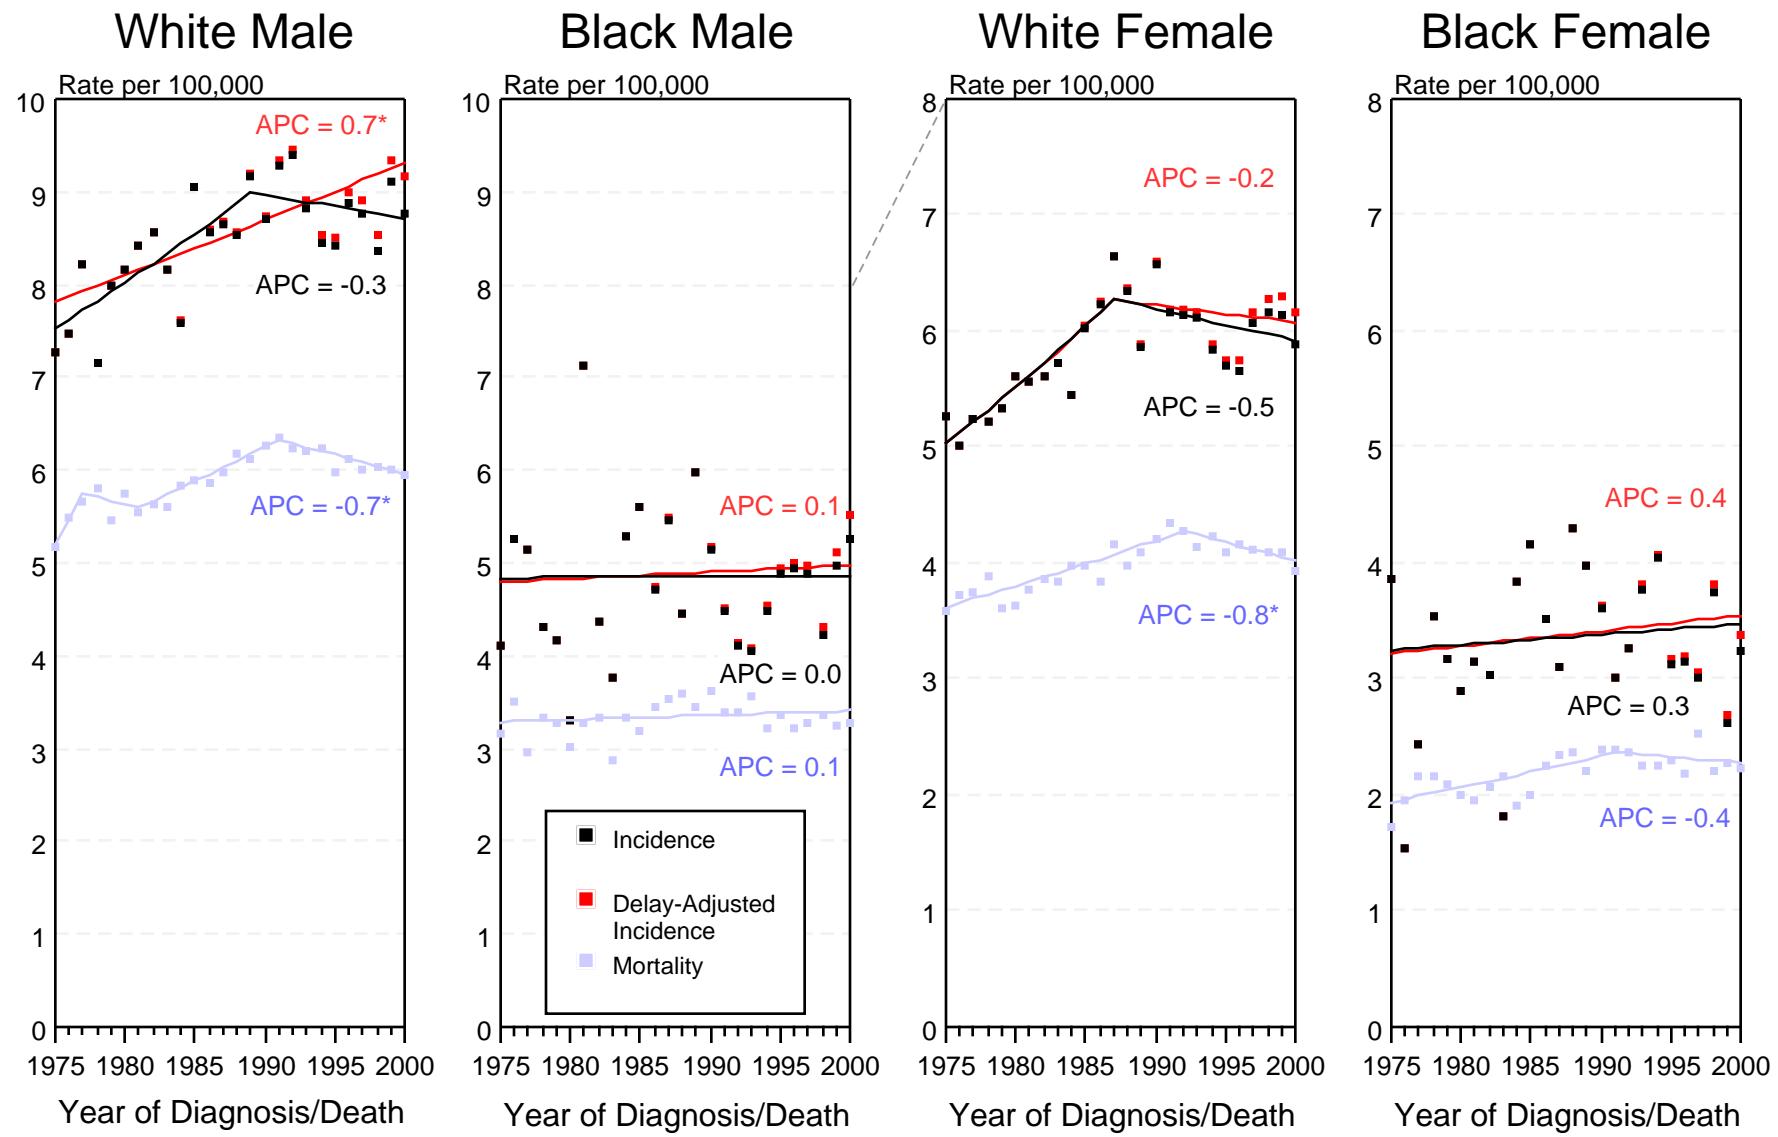

Figure III-1

+ Source: SEER 9 areas and NCHS public use data file. Rates are age-adjusted to the 2000 US standard million population by 5-year age groups. Regression lines and APCs are calculated using the Joinpoint Regression Program. The APC is the Annual Percent Change for the regression line segments. The APC shown on the graph is for the most recent trend.

\* The APC is significantly different from zero ( $p < 0.05$ ).
